**ENVIRONMENTAL HAZARDS**

This product is highly toxic to fish and aquatic invertebrates. To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters, or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure the wind or rain does not blow or wash pesticide off the treatment area. Sweeping any product that lands on a driveway, sidewalk, or street back onto the treated area of the lawn or garden will help to prevent run off to water bodies or drainage systems.

**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. For use on lawns, landscaped areas and plantings such as around ornamental trees, shrubs, flower and ornamental beds

**RESTRICTIONS**

**DO NOT** apply near fish pools, ponds, streams or lakes.  
**DO NOT** use on sod farms.  
**DO NOT** use more than 200 pounds (0.4 lbs a.i.) per acre per year.  
**DO NOT** apply this product to potential treated areas that are waterlogged or saturated with water. This product may not work effectively in these kinds of conditions.  
**DO NOT** harvest or consume fruit of nuts from trees that have been treated within 1 year (365 days). Keep children and pets off treated area until it has dried.  
**DO NOT** apply this product, by any application method, to linden, basswood or other Tilia species.

**PRODUCT INFORMATION**

This product can be used for control of soil pests such as mole crickets and white grubs, including the larvae of Japanese beetle, Oriental beetle, Chafers, Asian garden beetle, May beetle, June beetle and black turfgrass ataenius. This product can also be used to control billbugs, cutworms, chinchbugs and European crane fly larvae.

**TURF GRASSES**

Treat when insects first appear. Apply this product evenly over the turfgrass area at the use rate indicated in the table below, using a properly calibrated drop or rotary spreader. A more uniform application may be achieved by spreading half of the required amount of product over the area and then applying the remaining half in swaths at a right angle to the first. If rainfall has not occurred within 24 hours after application, irrigate treated turfgrass area to move the active ingredient through the thatch and down into the soil. Do not mow lawn until after irrigation or rainfall has occurred so that uniformity of the application will not be affected.

PEST	USE RATE PER 1,000 SQ. FT.
White grubs, including the larvae of Japanese beetle, Oriental beetle, Chafers, Asian garden beetle, May beetle, June beetle and Black turfgrass ataenius, billbugs, Cutworms, Chinchbugs and European crane fly larvae.	2.87 pounds
Mole crickets	3.80 pounds

**FLOWER BEDS, GROUND COVERS, ORNAMENTAL TREES AND SHRUBS**

**Application Instructions**

Apply this product at the rate of 2 tablespoons per 10 square feet of planting bed ( 1-1/4 cups per 100 square feet of planting bed ). Evenly spread granules to the soil over flower beds, ground cover plantings, shrub beds and under ornamental trees. The use of a hand-held spreader is recommended. Rake granules into the soil around plants. Water thoroughly after application.

This product works best when applied before mole crickets and grubs hatch. If necessary, consult your local State extension agent for the ideal times to apply this product in your area.

**SPREADER SETTINGS**

**Broadcast Spreaders:** For best results, apply in a circular path starting on the outside and working toward the center. A little overlap of product will ensure complete coverage.

**Drop Spreaders:** First, apply 2 border strips along the edge of each end of the lawn. Then apply product along the length of the lawn, overlapping slightly and shutting off the spreader before turning as you reach the edge of the border strips.

**Applications Instructions**

See Spreader Settings chart below. Adjust spreader to the appropriate setting. Make sure that the spreader works properly and spreads granules uniformly. Apply to the border and then fill in the center to ensure the entire area is covered completely. To make sure that the product is evenly distributed, walk at a steady pace making parallel passes. **DO NOT** use a spreader that applies granules in narrow, concentrated or uneven bands. Water thoroughly after application.

**Important:** It is important to follow the directions as indicated on this quality lawn care product as over-application may cause injury to the lawn. Measure the size of the area to be treated and do not over or under apply. Spreader settings are approximate. Differences may occur due to condition of spreader, speed at which applied, and roughness of area treated. Calibrate spreader prior to use according to the manufacturer's directions. Check frequently to be sure equipment is working properly and distributing uniformly. Close spreader when filling, stopping or turning. **DO NOT** hand spread.

PESTS CONTROLLED	WHEN TO APPLY	INDICATION OF DAMAGE	USE RATE PER 1,000 SQ. FT.
Grubs	Apply once anytime from May through mid-August	White grubs cause widespread damage to lawns by feeding on grass roots, causing it to turn yellow, then brown and die.	2.87 pounds
European crane fly larvae	Apply once, when these insects are present in large numbers.	European crane fly larvae cause damage by feeding on grass roots and disturbing the soil surface	2.87 pounds
Mole Crickets	Apply once anytime from mid-May through mid-June. Florida residents - Apply once anytime between early April through early May.	Mole crickets cause widespread damage by tunneling through the soil, while some species also feed on roots. Tunneling through the soil uproots the grass causing it to dry out, become thin and and weedy, turn yellow and eventually die.	3.80 pounds

**Application Instructions**

Apply early before grubs, mole crickets and European crane fly larvae hatch. Irrigate thoroughly within 24 hours of application to form a protective zone in the soil. This product can be applied over soil or mulch. Remove black plastic or other weed barrier material prior to application. Application to water saturated soils may decrease product effectiveness.

**Restrictions:**

Keep children and pets off treated area until it has dried.  
**DO NOT** apply to water saturated areas.  
**DO NOT** mow turf or lawn area until after sufficient irrigation or rainfall has occurred so that uniformity of application will not be affected.  
**DO NOT** use more than 200 pounds of this product (0.4 lbs a.i.) per acre per year.

**STORAGE AND DISPOSAL**

**DO NOT** contaminate water, food or feed by storage or disposal.  
**PESTICIDE STORAGE:** Keep out of reach of children and animals. Store in original container only. Store in a cool, dry place and avoid excess heat.  
**PESTICIDE DISPOSAL AND CONTAINER HANDLING:** Nonrefillable Container. **DO NOT** reuse or refill this container. **If empty:** Place in trash or offer for recycling if available. **If partly filled:** Call your local solid waste agency for disposal instructions. Never place unused product down any indoor( including toilets) or outdoor( including sewer) drain.
