

Long Lasting Lawn Fertilizer

23-0-8

OUR PRODUCT

This quality fertilizer blend provides the primary plant nutrients, plus extra iron for luxurious green color. This special formula also contains slow release nitrogen for prolonged feeding with less danger of burning the turf.

APPLICATION TIMING

For a show-place lawn throughout the growing season, apply this fertilizer every 10 to 12 weeks, or along with other turf care products (such as crabgrass preventer, weed & feed, insect control, etc.) as part of a total lawn care program. Most lawn grasses need 1 to 4 pounds of nitrogen per 1000 square feet over the growing season. Fertilizer application can be tailored to meet the exact nutrient requirements of your lawn, by having your soil tested. Contact your university extension service or local agricultural experiment station for information on soil testing services available in your area.

HOW TO APPLY

Spread this fertilizer on your lawn at the rate of 3.6 pounds per 1000 square feet, or as suggested by soil testing or professional advice. When temperatures exceed 90 degrees, or dry conditions exist, reduce the application rate by one-half to prevent possible burning of the turf.

Apply on a calm day when the grass is dry, using a properly calibrated spreader. Faster greening will result if the fertilizer is watered in after application.

For more uniform spreading and to avoid streaks, cover the area two times, each time applying at half the recommended rate, with the second application perpendicular to the first. Fill the spreader on a driveway or sidewalk so that any spilled material can be swept up and properly spread on the lawn. Do not hand spread.

Guaranteed Analysis

Total Nitrogen (N)	23.00%
23.00% Urea Nitrogen*	
Soluble Potash (K ₂ O)	8.00%
Iron (Fe)	1.00%
0.01% Water Soluble Iron (Fe)	
Derived From: Ferrous Sulfate, Muriate of Potash, Urea	
*11.50% Nitrogen stable w/dicyandiamide & N-(n-butyl)thiophosphoric triamide	
Chlorine (Cl), not more than 6.00%	F315

Use this formula to calculate the amount of product you need:

Length of Property	Total Square Feet
x Width of Property	- Non-Lawn Areas

SPREADER SETTINGS

Spreader	Single Pass	Double Pass
Dyna Green Broadcast	13.5	10
Ames Rotary	15	12
Earthway 11008 (Fertilome) Rotary	15	12
Cyclone SB3000 Rotary	7	6
Scotts AccuGreen AG-3 Drop	8	6.5
Scotts EasyGreen EG-3 Rotary	28	26
Scotts SpeedyGreen SG-3 Rotary	7	5
Spyker 24-22 Rotary	4.1	3.6

PATH A

Drop

First apply two strips at ends. Then apply product along the length of the lawn, shutting off spreader when turning.

PATH B

Rotary

Apply in a circular path, starting on the outside and working toward the center.

SWEEP

Sweep

Fertilizer may stain driveways, walks, patios, pools, etc. Sweep off thoroughly immediately after each use.

Note: Spreader settings are approximate and may vary according to the condition of your equipment. Your spreader should be calibrated before use! Shut the spreader off when turning or stopping, to avoid over application and possible turf damage. Excessive overlap, especially with drop spreaders, will cause over application and possible turf damage. Clean and lubricate your spreader after use.
